

Steve Morgan

A technical specialist Project Manager & Developer with Umbraco, PHP, SQL, Project Management, SEO and consultancy skills available for website design and build contracts. Digital experience with major UK and international brands (Pizza Hut, Play.com, The Co-operative). Self-motivated and a professional team-player with a can-do attitude, who excels in learning new skills and processes.

Work Experience

Freelancer Umbraco / Web Developer – Siempre Solutions Ltd

Freelancer

Apr. '14 – present

Siempre Solutions is my freelance company. I'm available for Umbraco website builds and general website design and build projects.

Independent Overseas Travel

South America

Aug. '13 – Apr. '14

Seven months of independent travel across Ecuador, Colombia, Peru, Bolivia, Chile and Argentina. Upon returning from travelling I resigned from my position at Amaze (I had been away on sabbatical) and have decided to seek freelance opportunities to return to more hands on roles.

Amaze – Manchester, Greater Manchester

Digital Project Manager – Full Time

Sept. '12 – Aug. '13

My final project for Amaze was to deliver a fully responsive (targeting mobile, tablet and desktop) and personalised website for Pizza Hut Restaurants UK www.pizzahut.co.uk/restaurants/, using Episerver v7.1 (one of the first major UK brands to deploy). The project was delivered against tight deadlines to meet the new VC backers requirements including a repositioning of the brand. The Restaurant business share the website domain with the Delivery brand so the project required close management and sensitive political handling to overcome a number of technicalities including tight time scales (requiring development to start before design was finalised), SEO restrictions and hosting technical complications.

The project was a success with the site launching on time and within budget – the customer has been pleased with the delivery, has found that restaurant site outperforms its rivals (including its own Delivery brand) and as a result has signed Amaze as its sole provider for their digital work. The site has also been shortlisted for awards. <http://www.thefwa.com/shortlist/pizza-hut-restaurants>

Also responsible for a number of digital projects for The Co-operative Group including a major project to unify the headers and footers of all group sites and deliver a new induction portal for new colleagues. Majority of work was delivered for Episerver v5 and v6. Responsible for delivering a Facebook application which promoted insurance for young drivers, targeting mobile devices and involving integration to existing applications within complex legal framework.

Other projects included delivery of a full website design and build delivery in Episerver using a taxonomy classification of articles and managing out-sourced projects.

Role required a deep understanding of all aspects of digital design and build – technical, requirements gathering, UX, cost reporting, account management, change control and managing delivery.

TicketPurse.com

Developer / Designer – Personal Project

Owner and creator of a full ticketing solution which includes a back-office administration system with a RESTful webservice (providing the ability to sell ticket stock to third parties) and website booking controls.

Enterprise level features include; secure logins, separation of data layers, auditing, CRM, booking workflow and action assignment, e-ticketing including barcodes. Hosted on a dedicated Linode Linux virtual server LAMP stack on which I configured and continue to maintain and administer. Built using AJAX, PHP and MySQL. Demo available at www.ticketpurse.com

Wax Digital Ltd – Hyde, Greater Manchester

Project Manager – Full Time

Feb. '11 – Sept. '12

Managing projects across teams in the business to deliver bespoke procurement solutions for clients, including Play.com, and an overseas government. The solution provided interfaces to ERPs including SUN Systems and Microsoft so the role required a deep understanding of the accounting process and data translation.

Involved in pre-sales through to delivery including requirements capturing via workshops with accountants / procurement and technical experts required a deep understanding of the procurement process and the product. In order to ensure quality deliveries I was often required to work outside of the remit of a Project Manager and take on additional technical, testing and training responsibilities to ensure smooth deliveries for multiple stakeholders.

CycleManchester.org.uk

Consultant / Developer – Contract

Jan. '11 – Feb. '10

Advised and developed a PHP & AJAX membership payment solution for their new WordPress powered website. I provided the full project process services - requirements gathering, specification writing, development, testing and delivery. Solution was delivered to timescales and the client provided very positive feedback.

Independent Overseas Travel

India, Nepal and Sri Lanka

Jul. '10 – Dec. '10

Period of independent travel across India, Nepal and Sri Lanka including 35 days of unguided trekking in the Himalayas.

Web Applications UK Ltd – Oldham, Greater Manchester

Project Manager – Full Time

Jun. '07 – Jul. '10

Joined as a Consultant and was promoted into a Project Management role managing teams of up to five developers, responsible for multiple projects and providing Account Management support for existing customers.

Successfully completed projects include designing and building a theatre-break packaging system for a multi-million pound organisation providing live prices to a website querying many different suppliers (flights, UK rail, Eurostar, hotels, theatre tickets). Project was delivered on-time and to specification, accommodating customer and technical changes using Agile-style development techniques (task breakdown, frequent deliveries, extreme programming).

Other projects included designing CMS-powered website solutions, using Umbraco, for package holiday operators and taking the in-house standard reservation software platform (MS-SQL / C# / ASP web-based system and webservice) identifying and fulfilling requirement gaps, managing the development, data migration, user training and installation for new customers.

Automotive Services Europe – Stockport, Cheshire

Senior IT Developer – Full Time

Feb. '06 – Jun. '07

Lead role in successfully delivering two major multi-million pound projects with new customers. Working as Senior Developer and PM I liaised with partners, customers and relevant IT departments to capture requirements and fulfil requirements for major automotive clients including General Motors and Toyota DE.

Automated process of applying foreign language translations to applications, created bespoke solutions and processes to resolve data submission issues from legacy and new third-party systems. Primary technologies used MS-SQL Server, C#, VB / VBA, MySQL, Access, ASP and IIS.

QinetiQ – Malvern, Worcestershire – SC level UK Security Clearance

Graduate Requirements Engineer – Full Time

Aug. '05 – Feb. '06

Role involved meeting customers to capture and document their requirements, produce user and system requirements documents (URD and SRD), using DOORS and the, C-based, DXL programming language.

Temporary Contracts (Various) – London & Milton Keynes

Data Input, Contracts Administrator

Jan '05 – Aug '05

Created bespoke MS-Office VBA macros where inefficient processes could be improved at the RNIB.

Overseas Working Holiday Employment / Travel

July '03 – Dec. '04

Network Rail – West Coast Management Unit (Midlands), Milton Keynes

Area Trend and Reports Engineer – Full Time

Sept. '02 – July '03

Recruited into Change Control to provide support in reporting and trending against a budget of £1.5bn of route modernisation works. Created an Access database to help track the process of trends (change requests) for the Midlands area, utilising VBA, to produce MS-Office reports (e.g. populating Word templates and creating Excel reports) meeting the approved procedures and collected additional requirements from colleagues.

Portfolio

- www.TicketPurse.com – design and build of a full ticket commercial solution (AJAX, PHP 5, MySQL, jQuery)
- www.duffa.org – design and build of an Ultimate Frisbee club's website using a fluid and responsive design. Includes a full admin system to manage the tournament registrations taking over £16,000 of payments in a single hour in 2013 (PHP, AJAX, PyroCMS & MySQL).
- <http://cyclemanchester.org.uk/> - built a membership process including payment with my own Caphcha solution and a back office function to download membership details in Excel and XML (WordPress, PHP 5, AJAX, jQuery)
- www.DateAlt.com – a music themed dating site (Smarty, PHP5 & MySQL)
- www.Mr-Takeaway.co.uk - owner & creator of a takeaway directory (Umbraco, MS-SQL & .NET) – build in XSLT and converted to RAZOR. Successfully upgraded from 4.0.1 to 4.11 with XSLT updates.
- www.stevemorgan.me.uk - set up a successful website giving advice on PHP, Umbraco, travelling and cycle touring which has received many positive and encouraging comments.

Education History

The Open University (Part Time)

Feb. '06 – Ongoing

Degree in progress: **BA / BSc (Hons.) Economics and Mathematical Sciences**

Modules taken: Maths (MST121) – 86% Pass, You and Your Money (DB123) – 84% Pass

The University of Manchester (formerly UMIST)

Sept. '99 – July '02

Degree: **BSc. (Hons.) Computing Science - 2:(i)**

Milton Keynes College, Buckinghamshire

Sept. '96 – Jun. '98

A-Levels: Business & Economics (A), Physics (C), Maths (D)

The Lord Grey School, Bletchley, Buckinghamshire
